ES BRASS PRODUCTS

Manufacturing

Our production facility is equipped with advanced machinery designed to achieve exceptional precision and efficiency in crafting brass components. The core equipment includes CNC machining centers, die-casting machines, lathes, milling machines, grinding tools, electroplating setups, and a range of inspection and testing instruments. This state-of-the-art technology enables us to produce superior-quality brass components customized to meet the unique requirements of our clients.

● Processing Material:

Brass & Special Copper Alloy Such as BS 6121, EN 50262:1999, BS 2870, CZ123, UNS 36000, BS 249, S.S. etc as per requirements.

● Machining Facility:

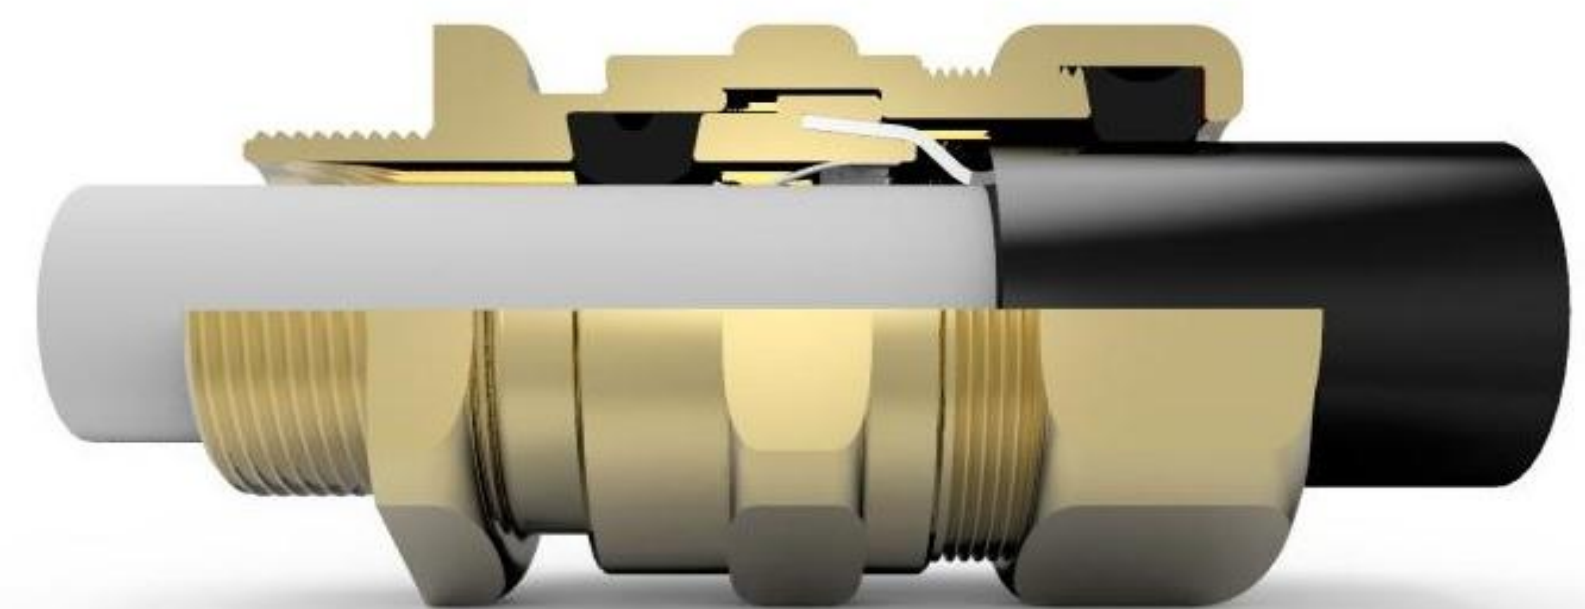

Bar Turning & Machining on Automatic Lathe,
Bar CNC Machining and Turning,
VMC Machining,
Forging + CNC Machining,
Casting + CNC Machining.

● Processing Range

1 mm to 1000 mm Diameter, also as per requirements.

● Primary Competitive Advantage

Experienced R & D Department,
Large Product Line
Good Financial Position & TQM,
Large Production Capacity,
Complete Assemblies with Plastics & Rubber Parts.
PPAP Level - III Documentation
Strong & Durable Packaging

Quality & Export

We proudly supply our products to both domestic and global industrial markets. Our primary export destinations include:

India

United Arab Emirates (UAE)

Kuwait

Iraq

Saudi Arabia

Oman

Middle East

South Africa

North America

South America

● International Packaging Solutions:

To ensure safe and efficient transportation, we provide export-quality packaging suitable for both air and sea shipments. Our packaging options are designed to meet international standards while offering tailored solutions to match customer specifications, including labeling and custom packaging strategies.

● Custom Packaging Options:

We offer a wide range of packaging choices tailored to customer needs, including Polybags, Small White Boxes, Transparent PP Folding Boxes, Cardboard Boxes, Outer Cartons, Wooden Pallets

● Transportation and Storage Care

Our packaging adheres to international trade regulations and the requirements of importing countries, ensuring compliance with safety standards. Proper dimensions, weight, and secure sealing facilitate easy handling, transportation, and storage. Our export packaging is designed to be highly durable and weather-resistant. Shrink-wrapping ensures waterproofing, while tight seals protect goods from potential damage during transit.
